

Central mean vs Rf (V=0.000, CC=12)

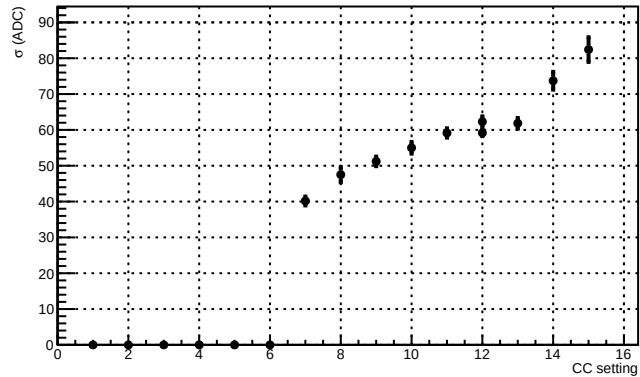

Central σ vs Rf (V=0.000, CC=12)

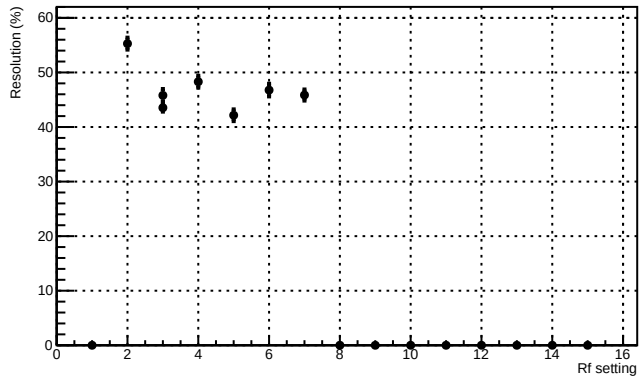

Central mean vs CC (V=0.000, Rf=3)

Central σ vs CC (V=0.000, Rf=3)

Central resolution vs Rf (V=0.000, CC=12)

Summary configuration

Voltage: 0.000 V

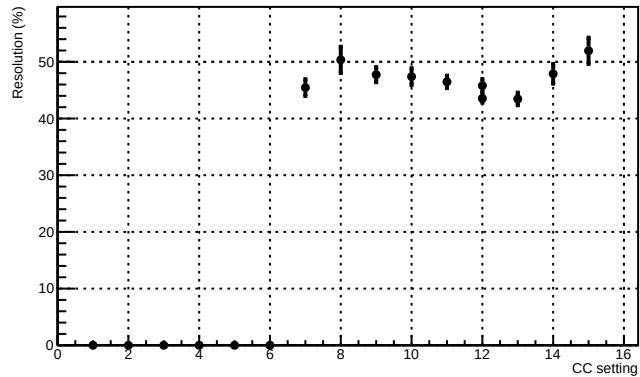

Width used: Gaussian fit σ

Rf scan reference CC: 12

CC scan reference Rf: 3

Number of processed runs: 30

Central resolution vs CC (V=0.000, Rf=3)

Interpretation

Mean tracks the signal scale.

σ tracks the spread.

Resolution = width / mean.

This PDF contains only one voltage.
